Paratyphoid—Continued.
Parasitology-Continued.
  compendium, (76) 848.
                                                    in-continued.
  historical account of work by Cornell Station,
                                                       fowls, (77) 108.
                                                       pigeons, (75) N.J. 691; (77) N.J. 546, 703,
        (79) [N.Y.]Cornell 71.
                                                           Ky. 848; (79) N.J. 890; (80) N.C. 109.
    and animals, (79) 679.
                                                       pigeons, immunization, (72) 845.
    guide for medical practitioners, (80) 538.
                                                       pigeons in Egypt, (72) 698, 845.
    manual, (78) 250.
                                                       pigeons, prevention, (78) 247.
    treatise, revised edition, (76) 218.
                                                       pigeons, role of Salmonella pullorum, (73)
  veterinary, guide, (79) 104.
                                                           110.
  veterinary, in Philippines, (75) 258.
                                                       silver fox, (78) 547.
                                                       turkeys, (71) 252; (75) 700; (77) Idaho 848,
  work in Ontario, (74) 99.
Paratetranychus-
                                                           858; (80) 828.
  alpinus on inconse cedar, (77) 521.
                                                       turkeys, transmission through eggs, (75)
  citri-see Citrus red mite.
                                                           Idaho 690.
  heteronychus-see Date mite.
                                                       young pheasants, (77) Mass. 856.
  illicis, notes, (71) Mich. 68.
                                                     organisms, differentiation, (75) 850.
  pilosus-see European red mite.
                                                   Paratyphosus bacterin, immunizing power, (71)
  sp., notes, (80) 512.
                                                           842.
  yothersi-see Avocado red mite.
                                                   Paratyphus in-
Paratheresis ....
                                                     foxes, (78) 256.
  attempted establishment in Louisiana, (80) 366.
                                                     swine, (73) 883.
  brasiliensis, parasite of Diatraea spp., (78) 826.
